WORKSHOP: “REACH BEFORE YOU TEACH:

Strengthening your students' engagement through Social Emotional Learning

- ✓ As educators, we are always concerned about classroom management and student engagement, looking for effective strategies to try in our lessons.
- ✓ When we want to reinforce our students' engagement in learning, it is valuable to have creative tools that help us effectively reach students intellectually, socially and emotionally.
- ✓ Implementing Social Emotional Learning will help learners not only to be better students, but to grow to be better people.
- ✓ Effective SEL programming fosters five interrelated sets of cognitive, affective and behavioral competencies: Self-awareness, Self-management, Social awareness, Relationship skills, Responsible decision-making.

CONTENTS:

In this workshop, we will show how more social and emotional learning can also build academic success and how these engaging activities suggested in class can be used in a consistent manner as an integral part of the language class.

- ✓ We will present examples of activities on how to engage all learners in the lesson supporting collaboration, communication and conflict-resolution skills, such as developing shared social norms, forging a class identity through getting to know each other activities and engaging students in challenging topics with opportunities to share personal reactions and responses while creating ways to express what they are feeling.
- ✓ Teachers, as relationship builders and inspirers of student engagement, should empower learners by focusing on engagement: “*Caring Makes the Difference*”.
